HANGS TIGHT AGAINST THE WALL

PicGenie123™ Accu-Hanger brackets are only 1/8" thick, which allows you to hang your pictures very tightly against the wall. By placing one Accu-Hanger bracket in the center on the bottom rung and removing the marking tab before hanging your picture, it becomes a spacer, which is equal in depth of the two hanging brackets. This way, your picture is perfectly parallel to the wall and has a very professional clean look.
