

## CORNER LOCK SECURITY

One of the GREAT features in using my Smart Hangers is they have the corner lock security advantage. By installing one screw in the bottom side hole and one in the top inside hole, you can lock the frame's corner miter joints together. Many people have experience the separation of a corner joint, only to hear they beautiful picture crash to the floor. You can attach Smart Hangers to all four corner to keep you frame securely locked together.

## WHAT A GREAT FEATURE!

*Picture Hanging Made Easy!*
