

HANGING PICTURES ON PLASTER or WOOD PANEL WALLS

- (1) Attach two Smart Hangers & Marking Tabs.
- (2) Fold up a sheet of copy paper as shown and tape to the wall where you will be making the marks.
- (3) Position and level your picture on the wall, then push to make marks on the masking tape/pad of paper.
- (4) Pound nails into marks through the pad of paper making an indentation on the wall behind the pad of paper. Remove the nail and pads of paper, then pound nails straight into the wall in marks leaving the heads out 1/8". **NOTE:** You can also pre-drill holes the diameter of the nails to help limit the plaster from chipping. If you do this, you can then squeeze some white school glue into the holes before inserting the nails into the holes.
- (5) Remove marking tabs and hang your picture. Push the top of the frame snug against the wall if glue was used.
